Skills

TypeScript, JavaScript, PHP, Python, SQL · Laravel, React, Next.js, Vue.js, Node.js, Express.js, React Native, Redux · PyTorch, TensorFlow, scikit-learn, OpenCV · AWS, Docker, Git, Linux, Elasticsearch · MySQL, PostgreSQL, MongoDB · REST APIs, GraphQL, Leaflet

Professional Experience

Mandala Tech | Software Developer | Aug 2022 – April 2025 (~3 years)

- Built a Laravel order management system supporting a 40K+ user e-commerce platform, improving operational workflows and reliability
- Rebuilt and migrated the e-commerce platform using Next.js, React, and AWS, automating migration of 100K+ records
- Collaborated with developers, managers, clients, and existing team members to translate requirements into solutions and drive product improvements

Code IT | Software Developer | June 2020 – July 2022 (~2 years)

- Developed multiple web applications using Laravel, Vue.js, and React.js across diverse client projects
- Built inventory, attendance, and business applications for clients across multiple industries
- Delivered projects in a startup environment, collaborating with clients and developers while mentoring junior interns

Education

Fanshawe College

London, Ontario

May 2025 – August 2026

Graduate Certificate in **Artificial Intelligence and Machine Learning** (Co-op)

GPA: 4.16 | *President's Honour Roll Recipient*

Tribhuvan University

Kathmandu, Nepal

June 2016 – May 2020

Bachelor of Science in **Computer Science and Information Technology**

Projects

Bearing Fault Detection

Developed a TensorFlow CNN using transfer learning to classify bearing faults from vibration signals, achieving 90% classification accuracy; authored a research paper submitted for publication.

Fatigue Detection

Developed a PyTorch facial image classification model to detect fatigue, achieving 84% accuracy and 87% recall for fatigue detection.

College Attendance Report System

Built a college attendance reporting system using Laravel and Vue.js, enabling attendance tracking, report generation, and centralized management of student attendance data.

Additional Experience

Logit Group | Telephone Interviewer | April 2026 – Present

Conducted structured interviews and collected accurate data for research and survey projects, strengthening communication, active listening, and attention to detail.

Fanshawe College LEAP Business Accelerator Cohort | Co-op | May 2026 – Sept 2026

Worked in an applied business accelerator environment focused on product validation, customer discovery, startup development, and real-world problem-solving.
